— PRODUCT OVERVIEW

Cisco CP-9971-C-K9 IP Phone Overview

The Cisco CP-9971-C-K9 is a Cisco Unified IP Phone 9971 in charcoal with a standard handset. It is designed for enterprise voice and collaboration environments that require an advanced user interface, multiple programmable lines, integrated network connectivity and optional video capability.

5.6-Inch Color Touchscreen

A 640 × 480 VGA touchscreen provides an intuitive interface for call control, contacts, directories and collaboration features.

Six-Line Call Management

Six programmable lines and session keys support busy executive, administrative and departmental communication workflows.

Gigabit and Wi-Fi Connectivity

Integrated 10/100/1000BASE-T Ethernet, a switched PC port and 802.11a/b/g Wi-Fi support flexible desk deployment.

Video-Capable Design

Optional Cisco Unified Video Camera support enables compatible video collaboration scenarios; the phone does not include a built-in camera.

— DEPLOYMENT NOTES

Compatibility, Licensing and Use Cases

CP-9971-C-K9 is primarily intended for Cisco Unified Communications environments, especially deployments managed through Cisco Unified Communications Manager. Actual compatibility depends on the CUCM release, firmware version, call-control configuration, device licensing and available accessories. Buyers should confirm that the required firmware and licensing are available for the intended installation.

This model is suitable for executive offices, reception desks, collaboration rooms, departmental managers, contact-center supervisory positions and enterprise users who need touchscreen call management, Gigabit networking, wireless connectivity or optional video.

Important: CP-9971-C-K9 is an EOL product. Confirm hardware condition, firmware, power accessories, handset, camera compatibility, support requirements and replacement-part availability before ordering.

— SHIPPING INFORMATION
