

CISCO CATALYST 9300L SERIES

Cisco C9300L-24UXG-4X Managed Network Switch

Powerful enterprise access switch featuring 24 Ethernet ports, including 8 multigigabit ports supporting speeds up to 10 Gbps, 16 Gigabit Ethernet ports, Cisco UPOE, four fixed 1G/10G SFP+ uplinks and StackWise-320 stacking technology. Designed for enterprise campus networks and demanding business environments.

24 Ports

Multigigabit

8 Ports up to 10G

Uplink Ports

4 x 10G SFP+

PoE Budget

880W UPOE

PRODUCT OVERVIEW

Cisco C9300L-24UXG-4X Enterprise Switch

The Cisco Catalyst C9300L-24UXG-4X is a stackable enterprise managed switch designed to support modern access-layer network deployments. It combines standard Gigabit Ethernet connectivity with multigigabit access ports and fixed high-speed uplinks.

The switch provides 16 Gigabit Ethernet ports and 8 multigigabit ports supporting 100 Mbps, 1 Gbps, 2.5 Gbps, 5 Gbps and 10 Gbps connections. This port configuration helps organizations connect a mix of traditional network devices and higher-bandwidth equipment through a single access switch.

Cisco UPOE support provides power over Ethernet for compatible devices. With the specified 1100W AC power supply, this model offers an 880W PoE power budget. Four fixed 1G/10G SFP+ uplinks provide options for connecting the switch to aggregation, distribution or other network equipment.

StackWise-320 technology supports stacking with compatible Catalyst 9300L models. Confirm software, licensing, stacking compatibility and the exact product PID before purchasing.

KEY FEATURES

Built for High-Performance Enterprise Networking

24 Ethernet Ports

Includes 16 10/100/1000 Mbps Ethernet ports and 8 multigigabit ports supporting speeds up to 10 Gbps.

10G

Multigigabit Connectivity

Eight multigigabit ports support 100 Mbps, 1G, 2.5G, 5G and 10G connections for compatible network devices.

SFP+

Four Fixed Uplinks

Four fixed 1G/10G SFP+ uplink ports support high-speed network connections using compatible transceivers.

UPOE

Cisco UPOE Support

Supports Cisco UPOE for compatible powered devices. The specified 1100W AC power supply provides an 880W PoE budget for this model.

320

StackWise-320

Supports Cisco StackWise-320 stacking technology with compatible Catalyst 9300L switches.

L3

Enterprise Network Access

A managed switching platform designed for enterprise access networks, campus deployments and business infrastructure.

TECHNICAL SPECIFICATIONS

Cisco C9300L-24UXG-4X Specifications

Specification	Details
Brand	Cisco
Model	C9300L-24UXG-4X
Product Family	Cisco Catalyst 9300L Series
Product Type	Managed Enterprise Network Switch
Total Ethernet Ports	24
Gigabit Ethernet Ports	16 x 10/100/1000 Mbps

Specification	Details
Multigigabit Ethernet Ports	8 x 100 Mbps / 1G / 2.5G / 5G / 10G
Uplink Ports	4 x fixed 1G/10G SFP+
PoE Technology	Cisco UPOE
PoE Power Budget	880W with 1100W AC power supply
Power Supply	1100W AC
Power Supply PID	PWR-C1-1100WAC-P
Stacking Technology	Cisco StackWise-320
Stacking Bandwidth	320 Gbps
Rack Form Factor	1U
Dimensions (H x W x D)	4.4 x 44.5 x 48.8 cm
Dimensions (H x W x D)	1.73 x 17.5 x 19.2 inches
Installation	Rack-mountable
Typical Applications	Enterprise Campus and Business Networks

DEPLOYMENT CONSIDERATIONS

Plan Your Cisco Network Deployment

Before deployment, verify the required software image, license, power configuration, compatible SFP+ transceivers, stacking requirements and network design. Actual feature availability may depend on the software release and license configuration.

For PoE deployments, calculate the combined power requirements of all connected devices and confirm the available power budget for the chosen power-supply configuration.

Ordering Note: Confirm the complete Cisco product ID, license option, power supply, included accessories, product condition and regional requirements before ordering. The listed dimensions are for the switch itself, not its shipping carton.
